

GLOVES SIZES - Indicative guide -

Black Fire 2.0

Sultan 2.0

In order to choose the perfect size for your glove, it is necessary to measure the circumference of the hand, starting from the center of the palm (width) and from the bottom of the palm to the top of the longest finger, the third finger (length).

Make sure to measure the right hand, if you are a right hand's player or the left hand in the opposite case. The measurement needs to be taken with a tape measure.

Attention! The measures mentioned below are indicative, because the standard sizes are those described, but logically they can change from person to person.

For example: a person can have the hand slimmer than another one and though his size, following the measurement results to be a "L", also a "M" size can fit due to the slimmer hand.
